- Establish a mechanism for housing-data sharing and housing-data collection to be used regionally, and eventually statewide

- Address eviction history as a barrier to new housing opportunity

- Invest in workforce housing specifically for oil and gas industry employees

- Rigorous vetting of all people who are paid to assist those in need of housing assistance to insure proper attitudes, adequate education, and trainability and weed out applicants (and civil servants) who are racist, not compassionate, and are just looking for a paycheck.

- Placing a CAP on the amount of rent one can charge for certain unit sizes and types

- Allow Realtors to be involved with assisting renters with homeownership through the Section 8 program even if they are board members without it being a conflict of interest

- Ensure that affordable housing does not equate to substandard housing by setting habitability requirements for landlords and the city to abide by, such as a Rental Registry

- Dealing effectively and efficiently with adjudicated property to get it back into commerce
